

GOTD Global — Investment Brief

Summary

GOTD Global is the world's first licensed protocol for P2P netting and escrow on the Solana blockchain.

The platform connects local exchange offices, fintech companies, and import/export operators, enabling instant, secure, and low-cost cross-border transactions without intermediaries.

Key mission: reduce commissions from 2–10% down to 0.1% and return control over financial flows to their direct participants.

Where We Are Now

- 50+ active hubs
- 20+ countries
- \$25M+ daily turnover
- MVP ready for closed testing
- DLT license (DMCC #993532) confirming legal status

GOTD Tokenomics

- Total supply: 1,000,000,000 (1 billion)
- 10% Presale
 - 5% before TGE at \$0.50
 - 5% after TGE at \$1.00
- 10% Team (with vesting)
- 10% Marketing & Partnerships
- 70% Network Liquidity

The token = access key and escrow guarantee.

Its value grows proportionally to network expansion and transaction volumes. The token is backed by the liquidity of platform hubs. A real working tool.

Market

\$30+ trillion
global import/export

\$250+ billion
global P2P transfers

Main pain points: expensive and slow settlements, lack of SWIFT access, high risk.

GOTD's solution: simple, fast, and secure infrastructure.

Why It's Unique

- ◆ Live network at launch (50+ hubs, real turnover)
- ◆ **Hybrid model:** decentralization (smart contracts) + compliance via local partners
- ◆ **Legal structure:** IFZA (development) + DMCC (token, DLT license)
- ◆ **Network effect:** new hubs attract others ("trustless growth")

Investment Offer

- **Instrument:** SAFT (Simple Agreement for Future Tokens)
- **SAFT price:** \$0.50 per token
- **Round target:** \$5–10M
- **TGE release:** after obtaining VARA license
- **Conversion:** eGOTD (testnet) → GOTD (mainnet) at 1:1 ratio

Potential

Short term (12 months):

\$1–2M presale (SAFT),
50+ hubs in the network,
daily turnover \$50–100M.

Mid term (3 years):

200–500 hubs, \$1B+/day,
GOTD token as the standard
of “deal guarantee”
in emerging markets.

Long term (5 years):

transformation of the
platform from P2P netting
into a global barter
marketplace for money
and goods (import/export).

Corporate Structure

- ◆ **GOTD TRADESYNC FZCO (IFZA)** — platform development & operations
- ◆ **GOTD BLOCKCHAIN LABS FZCO (DMCC)** — token issuance & DLT solutions
